Anatomy: Directional Terms Practice

In Anatomy, specific terms are used to explain the location of body organs, systems, as well as body movements.

- Fill in the missing words to make the passage correct using words from the word bank provided.
reference, side, stand, body, arms, hands, anatomical, forward

All anatomical terms have a _____ point which is called the _____ position. This is a _____ position where you _____ up, head straight and _____ by your _____ with the palm of your _____ facing forward.

• Complete these sentences using the terms superior and inferior.

1. The sternum is _____ to the nose.
2. The belly button is _____ to head.
3. The mouth is _____ to the eyes.

• Complete these sentences using the terms anterior and posterior.

4. The heel is _____ to the toes.
5. The spine is _____ to the sternum.
6. The belly button is _____ to the spine.

• Complete these sentences using the terms lateral and medial.

7. The arms are _____ to the midline.
8. The neck is _____ to the arms.
9. The shoulders are _____ to the midline.

• Complete these sentences using the terms proximal and distal.

10. The elbow is _____ to the fingers.
11. The ankle is _____ to the knee.
12. The wrist is _____ to the shoulder.

• Complete these sentences using the terms superficial and deep.

13. Fat is _____ to the skin.
14. The ribs are _____ to the lungs.
15. Nails are _____ to blood vessels.

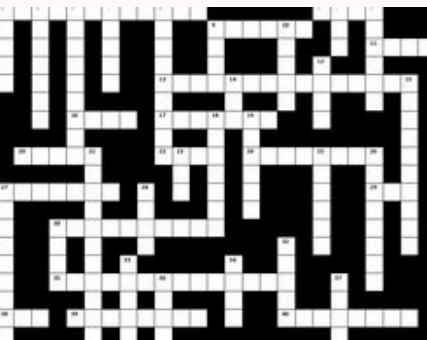

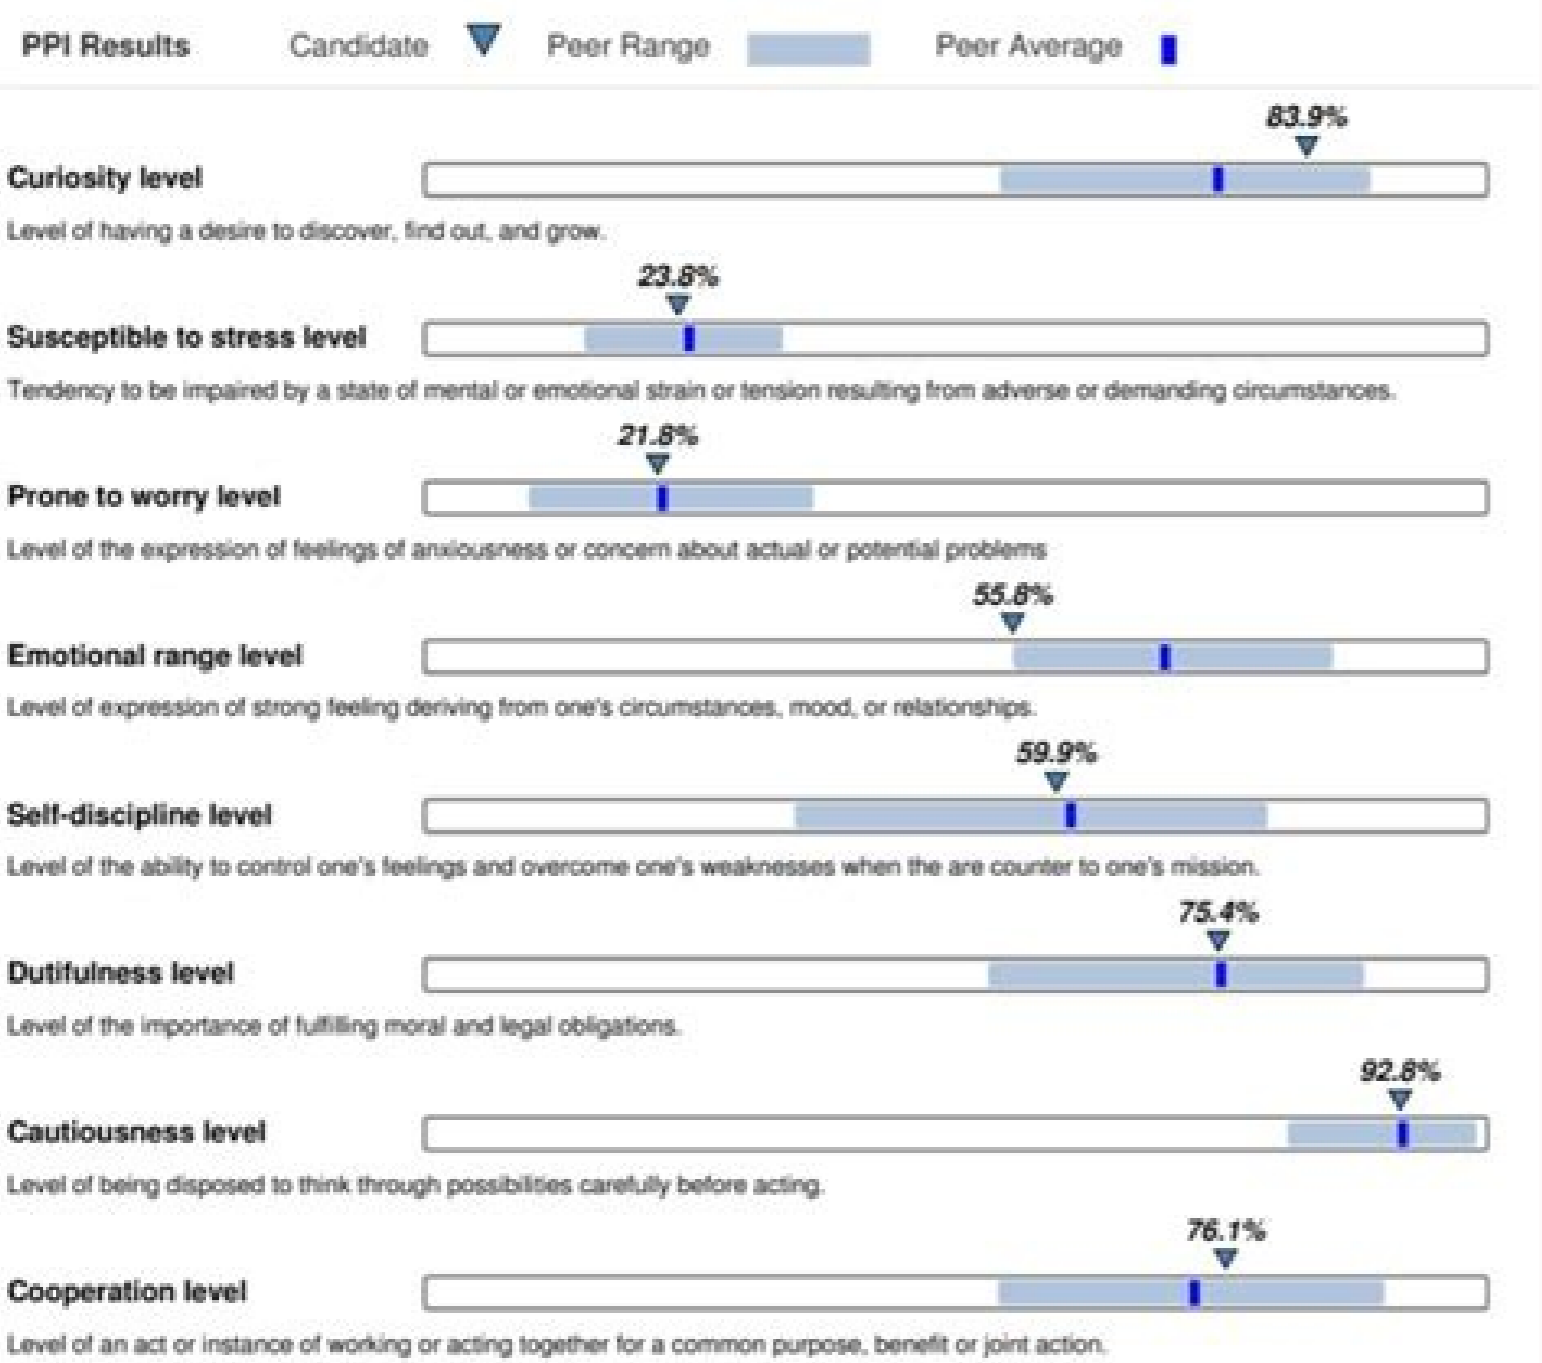

• Anatomical Terms - Word Match
Match the correct terms with their meanings. Place the correct letter in the empty column

Term	Letter	Definition
16. Superior	↓	a) closer to the top of the limb
17. Inferior		b) towards the head, or above
18. Anterior		c) back or at the back of
19. Posterior		d) closer toward the bottom or end of a limb
20. Lateral		e) towards the feet, or below
21. Medial		f) front, or in front of
22. Proximal		g) toward the side of the body, or away from the midline of the body
23. Distal		h) toward the midline of the body

• Write down the correct answer for each sentence using the two choices provided.

24. The big toe is on the lateral/medial side of the foot.
25. The shoulder blade is on the anterior/posterior side of the body.
26. The hand is distal/proximal to the elbow.
27. The hips are superior/inferior to the shoulders.
28. The shoulders are medial/lateral to the spine.
29. The knee is distal/proximal to the ankle.

30. What is the importance of having the anatomical position (read page 13)?

1. Watch the video and take notes. The video shows the structure of the cell membrane and how it controls what enters and leaves the cell.

2. Describe the structure of the cell membrane. The video shows the phospholipid bilayer and the various proteins embedded in it. Explain the function of each of these components.

3. Describe the process of osmosis. The video shows water moving from an area of high concentration to an area of low concentration through a semi-permeable membrane.

4. Describe the process of active transport. The video shows a cell using energy to move a substance from an area of low concentration to an area of high concentration.

5. Compare and contrast the structure of the cell membrane with the structure of the nuclear envelope. The video shows the nuclear envelope is a double membrane with nuclear pores.

6. The video shows the structure of the cell membrane and how it controls what enters and leaves the cell. Explain the function of each of these components.

7. Describe the process of osmosis. The video shows water moving from an area of high concentration to an area of low concentration through a semi-permeable membrane.

Flinnprep ap chemistry answer key.

Item # EL8459 EL2005 EL2000 Type 1 Classroom up to 30 Students 1 Classroom up to 30 Students Individual access of license 1/2 year school full year 12 months Access Price \$350.00 \$425.00 \$45.00 Enter the number of items Flinn Scientific's FlinnPREPTM—Line Course for AP® Biology• Provides students at any time, anywhere access to support materials. • Provides an engaging review of fundamental biology with a preview of AP Biology topics to prepare students for the challenging AP curriculum - all in a program. • Helps teachers track and monitor student and classroom progress with friendly performance diagnostic tools. • FlinnPREPTM can be easily used in the "Market Classroom" strategy. Use as a summer assignment to allow you to reach the floor running or throughout the year as complementary work. • Characteristics of content aligned to the great ideas and learning goals. Teachers benefit from FlinnPREPTM • free access to the content of the viewing course. • An easy-to-use reporting feature helps you form a baseline for progress checks with evaluation analysis. • Flexible design allows you to customize learning. Students benefit from FlinnPREPTM • The on-demand review of concepts in a clear and concise format helps students update their understanding and confidently maneuver through the AP Biology curriculum. • Easy-to-follow images, video and animation deliver interactive content to devices that are familiar to your students. • Interactive evaluation and games provide students with fair feedback in time. • Two complete practice exams help prepare students for the AP exam. FlinnPREPTM 15 AP® Biology Units • Fundamental Biologic Skills and Knowledge • Cells: Structure and Function • Cell Cycle • meiosis • Mendelian Genetics • Population Genetics • Evolution • Ecology: Energy Flow and Nutrient Cycling • Biochemistry • Energy and Metabolism • Organisational Regulation • Genetic regulation and cellular communication • Immune Response Room Licensing Options for AP® Biology For a purchase price you will receive a registration key that can be used to create your FlinnPREPTM teacher classroom and easily link all your students. The following licenses are valid after the activation date. • EL2000 FlinnPREPTM - AP® Online Biology Course, Single License • EL2005 FlinnPREPTM—AP® Biology Course Online, 1 Classroom up to 30 Students, Full School Year • EL8459 FlinnPREPTM—AP® Biology Course Online, 1 Classroom up to 30 Students, 1/2 School Year Note: Individual licenses are the perfect solution for students looking for additional advanced placement study resources. They are not intended for use in the classroom and do not include any teachers' classroom tools. ISBN: 978-1-933709-72-7 The evaluation for the AP Biology exam may seem scary. There is so much material to cover, and much of this is highly complex. However, if you plan your time well and use appropriate study materials and strategies, you can expect a great score on the exam. In this article, I will give you an overview of what the AP Biology exam is like, what you need to know to access it, and how you can use your study time effectively before the exam on Wednesday, May 10, 2023, at 12PM! What is the format of the AP biology exam? The AP Biology exam is a long test - three hours duration to be exact. As of 2020, the Bio test has undergone some fundamental structural changes in questions and format, so it is important that you know what to expect and exactly how the test is structured. Like other AP tests, AP Biology has two parts: a section of Choice and a free response section, each of which is worth 50% of its general score. These sections are divided divided different types of questions. The multiple choice section is the first section, consists of 60 multiple-choice questions and has an hour and 30 minutes duration. Each question contains four response options. Although you have a minute for each question, I would recommend keeping your pace in less than a minute per question in your first passage through the section. In this way, you will have some extra time at the end to come back and answer any complicated questions you jumped u guessed. There is no penalty of guessing in the test, so you must answer all questions, even if you have no idea which choice is correct (after trying to find out, of course!), the free answer section, which also lasts an hour and 30 minutes. short answer questions are worth 4 points each, while long questions are worth 8 to 10 points each. you will need to walk wisely in this section, divided evenly, that would mean you would receive 15 minutes per question. However, try to spend no more than 10 minutes on each short answer. I recommend doing the short answers first to warm up. then, if you manage your time well, you will have at least 20 to 25 minutes for every long response to the free response. here is a graph showing the current format of ap biology exam:
